Mozzate office and factory

## SPECIAL PURPOSE EQUIPMENTS DESIGN AND PRODUCTION

**The company:** STAC Strutture Acciaio S.r.l. is a family company that operates in the site equipments market since the early 1970's. Thanks to the versatility and great experience of its engineering department, STAC can face different kind of problems and suggest innovative solutions to develop tylor-made equipments that meet all the client and site necessities.

The kind of equipments produced by STAC Strutture Acciaio S.r.l. are, for instance, the following: bridge cranes, winches and lifting equipments in general, formworks for tunnels, piers, piers heads, beams, segments, concrete cellular tanks, tetrapods, breakwater walls, equipments for dams face slab, mobile service trolley, equipment for concrete segments and beams transport, launching girders, equipments for highways tunnel enlargement without traffic block. Any other possible application can be studied and developed.

STAC Strutture Acciaio S.r.l. has its own factory for the steel structure production and can carry out mechanical works as well as hydraulic and electric plants, besides STAC can perform on site assembling and commissioning worldwide.

Samples of STAC production.

**BRIDGE CRANES**

40 tons bridge crane Genova metro

40 tons bridge crane Brescia metro

**TRANSPORT TYRED EQUIPMENTS**

Concrete beams transport tyred trolleys

**TUNNEL FORMWORKS**

Formwork length: 10,00 mt Radius: 3,80 m

**LAUNCHING GIRDERS**

150 tons launching girder

**PORTS AND HARBOURS EQUIPMENTS**

Concrete cellular tanks slip-forms

Breakwater wall self-mobile formwork

**SPECIAL PURPOSE EQUIPMENTS**

Dams face slab equipments

Multi-purpose equipment for tunnels enlargement without road traffic block
